DATE JUN 22 2006

RECD. JUN 26 2006

SUBJECT: Requirement for Technical Reports for the 4-acre San Francisco Electric Reliability Project parcel near 25th and Louisiana Streets, San Francisco

Dear Ms. Kubick:

The San Francisco Public Utilities Commission (SF PUC) is proposing to build a power plant at the subject site. Although the California Energy Commission is the lead agency for licensing the project, the Water Board is the designated administering agency for all aspects of Site investigation and remediation activities. This letter requires that the SF PUC submit the reports listed below. As explained below, this information will help Board staff to better understand the conditions at the site and determine what actions are necessary before, during, and after construction of the proposed power plant to protect human health and the environment.

As agreed to in the June 8, 2006 meeting between Board staff and staff from SF PUC and the California Energy Commission, a Supplemental Investigation Workplan was submitted on June 20, 2006. The workplan identifies data gaps and describes the additional sampling activities proposed to fill them.

You are required to submit the following reports by the dates indicated:

1. **Supplemental Investigation Report by August 7, 2006.** This report shall include a full discussion and summary of the soil, groundwater and soil gas data collected during the field sampling. The report will address data obtained up to and including the Supplemental Investigation Workplan mentioned above.
2. **Ecological and Human Health Risk Assessment by August 7, 2006.** The risk assessment shall include a screening level evaluation as well as a site conceptual model to facilitate an analysis to determine if the contamination poses a threat to construction workers,

Preserving, enhancing, and restoring the San Francisco Bay Area's waters for over 50 years

PROOF OF SERVICE (REVISED 2/17/06) FILED WITH
ORIGINAL MAILED FROM SACRAMENTO ON 6/26/06

RR

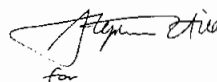

future Site occupants, or the Bay. The Supplemental Investigation Report may be incorporated into the Risk Assessment.

3. **Site Cleanup Plan by September 11, 2006.** This report shall include proposed cleanup standards and remedial actions considered for the Site, as well as an analysis of remedial alternatives and the criteria used to evaluate the effectiveness of the remedial methods.
4. **Revised Risk Management Plan by September 18, 2006.** This report shall describe the measures to be implemented in order to protect construction workers, area residents, and the environment during construction and post-construction operation.

This requirement for reports is made pursuant to Water Code Section 13267, which allows the Board to require technical or monitoring program reports from any person who has discharged, discharges, proposes to discharge, or is suspected of discharging waste that could affect water quality. The attachment provides additional information about Section 13267 requirements. Any extension in the above deadline must be confirmed in writing by Board staff.

If you have any questions, please contact Nancy Katyl of my staff at (510) 622-2408 or e-mail nkatyl@waterboards.ca.gov.

Sincerely,

Fact Sheet – Requirements For Submitting Technical Reports Under Section 13267 of the California Water Code

What does it mean when the regional water board requires a technical report?

Section 13267¹ of the California Water Code provides that "...the regional board may require that any person who has discharged, discharges, or who is suspected of having discharged or discharging, or who proposes to discharge waste...that could affect the quality of waters...shall furnish, under penalty of perjury, technical or monitoring program reports which the regional board requires."

This requirement for a technical report seems to mean that I am guilty of something, or at least responsible for cleaning something up. What if that is not so?

The requirement for a technical report is a tool the regional water board uses to investigate water quality issues or problems. The information provided can be used by the regional water board to clarify whether a given party has responsibility.

Are there limits to what the regional water board can ask for?

Yes. The information required must relate to an actual or suspected or proposed discharge of waste (including discharges of waste where the initial discharge occurred many years ago), and the burden of compliance must bear a reasonable relationship to the need for the report and the benefits obtained. The regional water board is required to explain the reasons for its request.

What if I can provide the information, but not by the date specified?

A time extension may be given for good cause. Your request should be promptly submitted in writing, giving reasons.

Are there penalties if I don't comply?

Depending on the situation, the regional water board can impose a fine of up to \$5,000 per day, and a court can impose fines of up to \$25,000 per day as well as criminal penalties. A person who submits false information or fails to comply with a requirement to submit a technical report may be found guilty of a misdemeanor. For some reports, submission of false information may be a felony.

Do I have to use a consultant or attorney to comply?

There is no legal requirement for this, but as a practical matter, in most cases the specialized nature of the information required makes use of a consultant and/or attorney advisable.

What if I disagree with the 13267 requirements and the regional water board staff will not change the requirement and/or date to comply?

You may ask that the regional water board reconsider the requirement, and/or submit a petition to the State Water Resources Control Board. See California Water Code sections 13320 and 13321 for details. A request for reconsideration to the regional water board does not affect the 30-day deadline within which to file a petition to the State Water Resources Control Board.

If I have more questions, whom do I ask?

Requirements for technical reports indicate the name, telephone number, and email address of the regional water board staff contact.
